Professional Summary

Data Analyst with 2+ years of experience in data analysis, reporting, and dashboard development. Skilled in interpreting complex datasets and transforming them into actionable business insights using Python, SQL, and Power BI. Experienced in data automation, KPI tracking, and data validation to improve efficiency and support data-driven decision-making. Strong ability to identify trends, optimize processes, and deliver client-focused analytics solutions.

Education

Bachelor of Engineering (ISE) , NIE Institute of Technology, Mysore - CGPA: 8.3	May 2023
Pre-University (PCMB) , Badriprasad Ji PU College, Mysore - Percentage: 82.62	May 2019
SSLC , Teresian Convent High School, Mysore - Percentage: 88.64	April 2017

Professional Experience

Data Analyst Sigvitas & Company (Aurlio Pvt Ltd), Mysore, Karnataka	Nov 2024 – Present
- Designed and managed ETL pipelines using Python and SQL, processing 10M+ records and improving data processing efficiency by 40%. - Analyzed large datasets to identify patterns, trends, and business insights to support decision-making. - Developed and maintained automated data processes, reducing manual effort and improving workflow efficiency. - Performed data cleaning, validation, and standardization to ensure high-quality and reliable reporting. - Collaborated with internal stakeholders to understand data requirements and deliver actionable insights. - Identified opportunities for process improvement and implemented automation solutions.	
Engineer Trainee Happiest Minds Technologies Pvt Ltd, Bangalore, Karnataka	Aug 2023 – Jan 2024
Contributed to development of a Java-based application with CRUD operations and used SQL/MySQL for database handling.	
Machine Learning Intern Compsoft Technology Solutions Pvt Ltd, (Remote) Bangalore, Karnataka	Aug 2022 – Sep 2022
Developed a Speech Emotion Recognition system using Python with preprocessing, feature extraction, and classification, achieving 60–70% accuracy.	

Projects

Global Superstore Sales Dashboard – Designed interactive dashboards using Power BI to visualize sales, profit, and performance metrics. Tracked KPIs, identified loss-making areas, and provided insights for business optimization and decision-making.

Customer Churn Analysis – Analyzed customer datasets to identify churn patterns and key drivers affecting retention. Generated insights and reports to support business decisions and improve customer retention strategies.

Image Forgery Detection System – Built a CNN-based model achieving 85–95% accuracy and implemented an end-to-end image processing and classification pipeline.

Technical Skills

Programming: Python, SQL (MySQL)

Data Analysis: Excel, Data Cleaning, Data Validation, Dashboard Development, KPI Tracking, Reporting

Machine Learning & Analytics: Clustering, CNN, NLP, BERT Embeddings, Cosine Similarity

Web Development: Flask, HTML, CSS, Jinja

Tools: Postman, VS Code, MySQL Workbench, Power BI

Certifications

- Python for Data Science – IBM
- Data Analytics Essentials – Cisco
